Staff data submission

Casual staff actuals packet (PIR) 2022

Version Details

Version: 1.00

The casual staff actuals packet is used to report data on staffing resources engaged on a contract basis by a provider throughout the year. Data for casual staff actuals is collected at the organisational unit level.

Scope

Higher education providers are required to report a casual staff actuals packet for each organisational unit that engaged people on a casual work contract basis at any point during the prior calendar year. Data is to be reported in relation to casual staff whose work duties related either solely to higher education, or to both higher education and vocational education and training, with the full-time equivalence expended in relation to work undertaken in both types of work sector being reported.

Data is not to be reported for staff:

- who were members of staff appointed for a limited term with a full-time or fractional full-time work contract

Reading the reporting requirements:

- Reporting deadlines
